

Simplex Plan

If you encounter a disruption of normal communication methods such as cell phone, landline, and internet service, try to access the repeater in your area. If the repeater is not operational, use the assigned primary VHF simplex frequency for your district. Only use a neighboring district's frequency to pass a message between districts.

The first amateur on frequency is the Net Control Station (NCS) until such time when they can no longer operate, or when a more qualified station can assume the NCS function. It is imperative that all Public Service Communicators build their NCS skills, as no one knows who will be operational in an event. A good NCS creates order and insures that effective communications takes place on the frequency.

Frequency Display Use/District (Primary #1 Alternate #2)

147.525	NORTH 1	NORTH SHORE SIMPLEX PRIMARY
146.565	NORTH 2	NORTH SHORE SIMPLEX ALTERNATE
146.430	KAPAA 1	KAPAA SIMPLEX PRIMARY
147.495	KAPAA 2	KAPAA SIMPLEX ALTERNATE
146.475	LIHUE 1	LIHUE SIMPLEX PRIMARY
147.510	LIHUE 2	LIHUE SIMPLEX ALTERNATE
147.480	KOLOA 1	KOLOA SIMPLEX PRIMARY
146.415	KOLOA 2	KOLOA SIMPLEX ALTERNATE
146.445	WAIMEA 1	WAIMEA SIMPLEX PRIMARY
147.585	WAIMEA 2	WAIMEA SIMPLEX ALTERNATE
147.570	CERTCOM	CERTCOM SIMPLEX
147.420	RED CROSS	RED CROSS SIMPLEX
146.550	ARES	ARES SIMPLEX
146.595	NCS MSG	NCS MESSAGE SIMPLEX
146.520	NTL CALL	NATIONAL CALLING SIMPLEX
147.450	SKYWARN	SKYWARN SIMPLEX
